

FEED BIRDS NOT WILDLIFE

DO'S AND DON'TS

By following these simple guidelines, your backyard will be inviting and attractive for birds and will help to keep out other wildlife such as deer and raccoons.

DO'S

- Do: Provide a bird bath that is kept clean and has fresh water.
- Do: Elevate bird feeders to deter wildlife from getting bird feed.
- Do: Provide habitat such as bushes or a bird house.

DON'TS

- Don't: Place bird seed on the ground, as it makes them easy prey to other wildlife and susceptible to deadly chemicals, which may be in your lawn.
- Don't: Put bird feeders by windows – bird window collisions are very common.
- Don't: Put out bread and other human food that is detrimental to wildlife and may attract deer and raccoons (a violation of City ordinance).
